

OLDACHE Oussama Nazim

COASTAL ENGINEER & GEOLOGICAL TECHNICIAN

Master's graduate in Marine Geosciences and Coastal Engineering, with a solid background in spatial data analysis, remote sensing and programming. Combines scientific rigour with an entrepreneurial mindset, gained through freelance work in e-commerce and content creation. Autonomous, adaptable and results-oriented

SKILLS

TECHNICAL SKILLS

- GIS: ArcGIS, QGIS
- Remote sensing: Google Earth Engine, Sentinel-2
- Programming: Python, MATLAB
- Modelling: SWAN, Delft3D
- Data analysis & machine learning
- Technical reporting
- Content creation & social media marketing

SOFT SKILLS

- Communication
- Teamwork
- Problem Solving
- Analytical thinking
- Attention to Detail
- Adaptability
- Entrepreneurial mindset

CERTIFICATIONS

- Microsoft Office Suite (Word & PowerPoint)
Great Learning Academy | 2025
- Copernicus Arctic Hub
Copernicus & Mercator Ocean International | 2026
- The Copernicus Marine Toolbox
Copernicus Marine Service & Mercator Ocean International | 2026

LANGUAGES

Native	B2	B2
Arabic	French	English

EDUCATION

Baccalaureate in Technical Mathematics
Lycée TECHNICUM ABDELLAH BEN ABBES, Alger
Specialization: Technical Mathematics (Process engineering)
2019

Licence in Applied Geology
University Of Science And Technology Houari Boumediene, Algiers
2023

Master II, Marine Geosciences & Coastal Engineering
University Of Science And Technology Houari Boumediene, Algiers
2026

PROFESSIONAL & FIELD EXPERIENCE

E-Commerce Teleoperator & Customer Service 2019 – 2021
- **Handled client confirmations, phone sales, upsells, and fulfillment tracking to boost delivery success rates.**

E-Commerce Founder & Manager (Algeria, Libya, Saudi Arabia) 2022 – Present
- **Managed cross-border e-commerce operations, order verification, COD logistics, and customer support across 3 markets.**

Applied Geology Field Researcher (Bou Saâda) 2023
- **Performed geological mapping, structural measurements, and stratigraphical logging during undergraduate fieldwork.**

Marine & Coastal Field Researcher (Tigzirt) 2024
- **Carried out field observations in a coastal environment.**
- **Acquisition of in situ topographic data, monitoring of the shoreline, and conducting an environmental impact study on the coastal environment.**

ACADEMIC PROJECT

Marine Pollution in the Bay of Algiers, Master's Thesis

- Combined physico-chemical data and remote sensing.
- Compared spectral indices and identified the best performers in complex coastal waters.

Shoreline Change & Wave Modelling

- Quantified coastal erosion and accretion from Sentinel-2 imagery (ArcGIS Pro, DSAS).
- Modelled waves and swell with SWAN for several zones in Algeria.

Satellite-Derived Bathymetry, Plage des Sablettes

- Built an end-to-end pipeline, from Google Earth Engine processing to machine learning (Random Forest, Stumpf, Lyzenga).
- Delivered a report, QGIS maps and an interactive web viewer.
